EDUCATION

Pursuing BTech in Computer
Science Engineering with
specialization of Artificial
Intelligence and Machine Learning
Batch: 2026

EXPERTISE

Python
My SQL
Microsoft Power BI
Advanced Excel
Communication Skills
Critical Thinking

ACHIEVEMENTS

Microsoft PL-300 Exam
May, 2025

Python Certification
IIHT, Durgapura
August, 2024

My SQL Certification
IIHT, Durgapura
December, 2024

SUMMARY STATEMENT

Result oriented data analyst with advance knowledge of skills like Python, SQL, Power BI and Advanced Excel. Skilled in transforming data into actionable insights to optimize business strategies, improve performance and drive data driven insights.

Projects

Employee Management System (August 2024-September 2024)

- Developed a Python-based application using Tinkter to manage employee data, including adding, updating, and deleting records.

ChatBot using Python (October 2024-December 2024)

- Designed a conversational chatbot using Python libraries

Hospitality Domain Dashboard (January 2025-February 2025)

- Developed an interactive power bi dashboard for Hospitality Domain using real-time data sourced from Git-Hub, enabling insightful analysis of key performance metrics
- Performed data cleaning, transformation and visualization to uncover trends in occupancy rates, customer satisfaction and enhancing decision making capabilities

Covid-19 Metrics of World (April 2025-May 2025)

- Designed an interactive power Bi dashboard to visualize global Covid 19 metrics using publicly available datasets from Git-Hub, providing insights into cases, recoveries and vaccinations.
- Executed data processing including cleaning, transformation and DAX measures to highlight country-wise trends and support data-driven analysis

INTERESTS

- Public Speaking
- Data Visualization
- Business analytics and dashboard design
