EDUCATION

BTech in Computer Science
Engineering with specialization of
Artificial Intelligence and Machine
Learning
Batch: 2026

EXPERTISE

Python
My SQL
Microsoft Power BI
Advanced Excel
Communication Skills
Critical Thinking

ACHIEVEMENTS

Microsoft PL-300 Exam
May, 2025

Python Certification
IIHT, Durgapura
August, 2024

My SQL Certification
IIHT, Durgapura
December, 2024

SUMMARY STATEMENT

Analytical and detail-oriented Data Analyst skilled in leveraging tools like Python, SQL, Power BI, and Excel to extract actionable insights and drive strategic decision-making. Proven experience in designing interactive dashboards, handling large datasets, and presenting data-driven recommendations. Known for strong communication, problem-solving abilities, and a passion for data storytelling.

Projects

Covid-19 Metrics Dashboard | Power BI

April 2025 – May 2025

- Built a global COVID-19 metrics dashboard using GitHub datasets.
- Cleaned and transformed data, applied DAX to visualize trends in cases, recoveries, and vaccinations.

Hospitality Domain Dashboard | Power BI

January 2025 – February 2025

- Developed a real-time hospitality dashboard analyzing occupancy, customer satisfaction, and revenue trends.
- Used GitHub-sourced datasets for end-to-end BI pipeline including transformation and visualization.

Employee Management System | Python, Tkinter

August 2024 – September 2024

- Created a GUI-based system to add, update, and delete employee records.
- Used file-based storage and logical validations for data integrity.

ChatBot Application | Python

October 2024 – December 2024

- Designed a rule-based chatbot with basic NLP logic using Python libraries for conversational interactions

Interests

- Public Speaking
- Dashboard Design
